Product Description

This colourful 2 in1 Walker is a mobile playcentre and walking frame in one.

As soon as your little one begins to toddle, 2in1 Walker is simply ideal to learn to walk in a playful manner. Simply put your child in its seat and the fun may begin! The little discoverer can hold onto the two lateral handles, while wheels make it even more entertaining. Nevertheless, stoppers prevent your child from falling down from stairs.

The playcentre invites the little hands to grab and turn around the different elements supporting the development of your child's motor skills. And when pushing the buttons, children's rhymes begin to play and the colourful lights will mesmerize your little discoverer. To parents' delight, the playcentre can be turned off, too, or completely removed. The now free place offers space for other toys or little snacks.

The height-adjustable 2in1 Walker can even more! Once your little one can walk a little bit better, the seat unit can be removed. Thanks to its 3 different height-adjustment, this walker will grow along with your child.

2 in 1 Walker Data
